10+ YEARS IN WEB • TYPESCRIPT • REACT & NEXT.JS • NODE.JS & APIS • SSR/SSG/ISR • WEB PERFORMANCE • FRONTEND ARCHITECTURE

ABOUT

Senior Frontend Engineer with 10+ years of experience in web development, focused on TypeScript, React, and Next.js.

Building digital solutions, including high-traffic web projects, with frontend and component architecture, Design Systems, SSR/SSG/ISR rendering strategies, Design-to-Code, technical SEO, accessibility and performance.

I contribute to requirements gathering and cross-functional alignment across clients, design, and development. I also coordinate workstreams, manage tasks, make technical decisions, and work closely with partners and collaborators.

As a full-stack developer, I lead end-to-end projects as needed, primarily working with Node.js, APIs, headless CMS, and integrations.

// STACK

Technical stack and specialties

FRONTEND

TypeScript, JavaScript (ES6+), React, Next.js (App Router), Vue.js, Nuxt.js, Tailwind CSS, Sass, React Server Components, SSR/SSG/ISR, i18n

BACKEND & APIS

Node.js, APIs REST, GraphQL, Strapi (Headless CMS), WordPress, PostgreSQL

WEB QUALITY

Web Performance (Core Web Vitals), Web Accessibility (WCAG), Technical SEO

CLOUD & DEVOPS

Git, CI/CD (GitHub Actions), Docker, Docker Compose, Vercel, AWS (S3, EC2, Route 53, CloudFront), Nginx, Linux

DESIGN & TOOLS

Figma, Playwright (E2E), AI-assisted Development (Claude)

WEB FUNDAMENTALS

HTML5, CSS3

// EXPERIENCE

Professional history

Oct.2023 - Feb.2026

2 years and 5 months _

Frontend Engineer

Bespoke One.bra

Main client: Bradesco

Worked on a dedicated operation for Bradesco, engaging directly with the client on solutions for the bank's digital channels.

Took on greater autonomy, leading frontend workstreams, defining architecture and standards, running code reviews, and overseeing delivery quality together with the development, design, and client teams.

- Contributed to the evolution and consolidation of Bradesco's email Design System, replacing image-based templates with reusable, responsive, and accessible HTML components, complete with fallbacks and rendering tests across different email clients. The new structure increased communication consistency, helped reduce delivery issues, and improved readability across devices and providers.
- Led the frontend of high-traffic projects, including Onboarding Classic, used in the customer journey after new Bradesco card issuance. During the project's certification process, I addressed pentest findings, defending the architecture and technical decisions and making the adjustments needed to meet the bank's security requirements.

Main stack: TypeScript, React, Next.js, Node.js, Tailwind CSS, HTML for email, Figma

Mar.2021 - Oct.2025

4 years and 8 months _

Lead Software Engineer (Frontend-Leaning)

Agência Aza8 • PJ contract

Technical lead for the agency's technology area, working on solution definition, requirements gathering, architecture, and technical direction for projects. I was the go-to reference for decisions on applications, tools, infrastructure, services, and new technology initiatives.

- Led end-to-end projects, from technical definition through launch and maintenance, working across frontend, backend, CMS, infrastructure, and deployment.
- Coordinated team members and development workstreams, managing tasks, code reviews, delivery tracking, and technical support.
- Built websites, platforms, and web applications focused on React and Next.js, along with full-stack solutions using Node.js, Strapi, REST APIs, and PostgreSQL.
- Set up hosting environments and deployment processes with AWS, DigitalOcean, and Docker, including domain and service configuration.

Main stack: TypeScript, JavaScript, React, Next.js, Node.js, Strapi, PostgreSQL, REST APIs, Docker, Docker Compose, AWS, DigitalOcean, Vue.js, Nuxt.js

Oct.2023 - May.2025

1 year and 8 months _

Full-Stack Software Engineer (Frontend-Leaning)

Banco Digimais • PJ contract

Worked on the end-to-end development of Banco Digimais' new website during the bank's rebranding, responsible for the technical implementation of the new web experience.

Technically led the project, defining architecture, technologies, and implementation standards, as well as alignment with design, infrastructure, and security.

- Structured the web solution with React and Next.js integrated with a headless CMS in Strapi and PostgreSQL, defining content modeling, manageable areas, and the blog structure.
- Implemented responsive HTML email templates following the new visual and communication standards defined during the rebranding.
- Defined the application's runtime setup with Docker and the technical requirements for the deployment process led by the bank's infrastructure team.
- Led the technical adjustments arising from pentests and defended architecture decisions with the security team during the certification process.

Main stack: TypeScript, JavaScript, React, Next.js, Node.js, Strapi, PostgreSQL, REST APIs, Docker

Jun.2019 - Oct.2023

4 years and 5 months _

Mid-level Frontend Developer

Agência One Digital

Main client: Bradesco

Worked on the interface team responsible for digital campaigns, landing pages, and pages for Bradesco's portal, focused on the implementation and quality of the frontend layer. Followed the client's technical and visual standards across deliveries for different digital channels of the bank.

- Developed interfaces and components for Bradesco portal campaigns and pages, maintaining responsiveness, accessibility, performance, and visual consistency across deliveries.
- Worked on the creation and initial development of Template Bradesco 1.0, migrating emails from image-based templates to responsive HTML components compatible with different email clients and devices. This structure gave rise to the work that continued evolving into the bank's email Design System.
- Was responsible for configuring and republishing the Blog Saber para Crescer on a Linux environment, directly on Bradesco's servers at Cidade de Deus, restoring the WordPress application after an outage.

Main stack: JavaScript, HTML, Sass, Vue.js, WordPress, Linux, Figma

Aug.2018 - Feb.2019

7 months _

Mid-level Frontend Developer

Agência Cave Digital

Worked on frontend development of web projects for different agency clients, mostly built on WordPress. Built interfaces, custom themes, CMS, websites, and landing pages, and maintained legacy projects.

- Led the frontend of an e-commerce store built from scratch alongside the client's backend team, responsible for the interface layer implementation.
- Worked on the frontend of the Galeria do Rock portal, structuring theme pages and templates in WordPress to showcase the venue's stores and content.
- Occasionally contributed to the development of a hybrid application with Ionic and Vue.js.

Main stack: JavaScript, WordPress, Sage 9, Understrap, Vue.js, Ionic, Webpack

Jun.2018 - Aug.2018

3 months _

Frontend Developer

Agência Profit-e

Worked on the frontend development and maintenance of VTEX e-commerce stores, implementing features, maintaining interfaces, and working on performance improvements and stability testing.

Main stack: VTEX, JavaScript, jQuery

Sep.2016 - Apr.2018

1 year and 8 months _

Junior Web Developer

Agência L4U

Worked on frontend development of websites, portals, landing pages, and WordPress projects.

- Mapped and implemented the Portal Franquia Dia pages on WordPress, a project for the brand's franchisee network.
- Worked on the development and testing of Metlycs, the agency's own marketing automation platform.
- Structured styles using Sass, BEM, and OOCSS, applying frontend code organization and reuse standards.

Main stack: JavaScript, HTML5, CSS3, Sass, BEM, OOCSS, WordPress, Node.js, Docker

// EDUCATION

2019 - 2021 • Completed

Technologist Degree in Systems Analysis and Development

Faculdade Impacta de Tecnologia (FIT)

2015 - 2017 • 4 semesters completed

Bachelor's Degree in Computer Science

Universidade São Judas Tadeu (USJT)
